# T A B L E S,

Shewing the Gross Weight of HOPS reduced into Neat Weight; what price the Hundred at any price the Pound; and what Duty is to be paid for any Quantity.

## E X P L A N A T I O N.

Table I. In the first column you have the gross weight in hundreds, quarters, and pounds; in the second is the gross weight in pounds only; and in the third is the neat weight answerable thereto.

Thus, 1 C. 1 qr. 13 lb. is 153 lb. gross weight, and 137 lb. 7-10ths neat.

Table II. In the first column is the price per pound; and against it, in the second, is the price per hundred weight.

Thus, one hundred at 5½d. per pound comes to 2l. 9s. 0d.

Table III. In the first column are the pounds neat; and in the second the duty to be paid for the same, at one penny per pound.

Thus, the duty for 1030 lb. neat weight is 4l. 5s. 10d.

TABLES

## T A B L E S,

S H E W I N G

The TRUE VALUE of any Quantity of CORN,

From ONE to TEN QUARTERS.

At any Price, from ten Shillings to three Pounds per Quarter,

C A L C U L A T E D,

Both for buying and selling at TWENTY to the Score, and also at  
the allowance of ONE and TWENTY to the Score.

## E X P L A N A T I O N.

IN every page, on the left hand, in the price of Twenty to the Score, and on the right, even with it, is the price of Twenty-one to the Score, from one to ten Quarters; and at the top of each column is the price of the quarter, beginning at ten shillings, and ending at sixty shillings. The first column in each division contains the number of quarters, and the other columns the value of each respective quantity, in pounds, shillings, pence, and farthings. At the bottom of each column will be found the price of one bushel.

## E X A M P L E.

What is the value of thirteen quarters, at eleven Shillings and six-pence per quarter, twenty to the Score.

Find the price upon the top of the column, then look for ten quarters, and you will find the value to be 5l. 15s. 6d. then cast your eye up the column for three quarters, the value of which is 1l. 4s. 6d. then add the two sums together, which makes 7l. 9s. 6d. the value required.

If the quantity be any number of quarters with odd bushels, you must take out the value of the quarters, and then the price per bushel, and add their sums together, and the total will be the value required.

But if the given price be any number of shillings and three-pence or nine-pence, first find the value of the given quantity, at the price next less, and also at the price next greater, then add the values together; half the sum is the true value sought.

The archdeaconry of Canterbury has the pa-  
tronage of St. Mary and St. Clement in Sand-  
wich, Hackington, Lympne, Westhyth, Teynham, Stodmarsh, St. Mar-  
garet in Canterbury, Lynsted, and Doddington, with the Chapel of Stone,  
and Iwade curacy, and the impropriations of most of them. It is in the  
gift of the Archbishop.

The first Archdeacon (whose name is recorded as such) was Wilfred, in  
the year 798.

There are twelve prebends in this church, three of which, viz. the first,  
fourth, and sixth, are in the gift of the Archbishop and all the rest in the  
gift of the King: none of the said prebends are charged with the payment  
of first-fruits or Tenths.

Note, That almost all the tenths of this diocese are payable to the  
Archbishop; the livings by the discharging acts are only discharged from  
the payment of first-fruits; the tenths being the property of the Arch-  
bishop, the same are still payable unto him.

## DIOCESE of ROCHESTER.

### BISHOPRIC

This Bishopric is the most ancient, next to Canterbury, of any in England; a bishop's see being erected there by St. Augustine, who first preached the gospel to the Saxons, in the year 606. The cathedral church there was first erected by Ethelbert, king of Kent.

The Deanry, constituted about the year 1541, is in the gift of the king.

The Archdeaconry, erected about the year 1089, is in the gift of the bishop of Rochester

There are six prebends in this church, not charged with first fruits and Tenths, four of which are in the gift of the lord chancellor; one is annexed to the provostship, of Ortel-college, Oxford, by an act of parliament 12<sup>o</sup> queen Anne: and one is annexed to the archdeaconry of Rochester, by letters patent of king Charles I.—These, with the deanry, pay a rent charge of 115l. in lieu of first fruits.
